Paris, France • +33 7 75 74 55 53 • manjunath.avula30@gmail.com • linkedin.com/in/manju30 • github.com/Manju256nath

PROFESSIONAL SUMMARY

Data Analytics professional with 3 years at Accenture, building Power BI, BOARD BI, and Tableau dashboards that inform business decisions. Improved reporting accuracy by 20% and maintained 99% data availability across enterprise reporting workflows for 100+ stakeholders. Currently pursuing an MSc in AI for Business at NEOMA Business School, combining SQL/data modeling expertise with Generative AI and Python to seek Data Analyst, Business Analyst and BI roles in France. -- **Immediate joiner**

SKILLS

Analytics & Visualization: Power BI, Tableau, SQL, BOARD BI, Advanced Excel, Dashboard Development, Data Modeling

Business Analysis: KPI Monitoring, Forecasting, Root Cause Analysis, Process Improvement, Requirements Gathering, Stakeholder Management

AI & Programming: Python (Pandas), Generative AI, Prompt Engineering, Google Gemini, Scenario Analysis

Enterprise Tools: SAP BI/BW, Azure Cloud, ServiceNow, Microsoft Office Suite, SharePoint

PROFESSIONAL EXPERIENCE

Packaged App Development Analyst — Accenture

Dec 2024 – Sep 2025

Hyderabad, India

- Built 12+ business performance dashboards in Power BI and BOARD BI, enabling data-driven decisions across 5+ business functions.
- Conducted KPI analysis and reporting to flag operational trends and risks, identifying performance-improvement opportunities each quarter.
- Delivered forecasting and scenario-planning support across multiple business cycles using BOARD planning solutions to strengthen forecast accuracy and support strategic decision-making.
- Improved reporting accuracy by 20% through data validation, reconciliation, and process-optimization initiatives.

Associate Software Engineer — Accenture

Oct 2022 – Nov 2024

Hyderabad, India

- Built and maintained 10+ KPI dashboards in Power BI, used by 100+ stakeholders for operational and business performance monitoring.
- Analyzed business data from SAP and non-SAP sources using SQL, translating requirements into reporting and analytics solutions for cross-functional teams.
- Ensured 99% data availability by monitoring critical reporting workflows and proactively resolving issues before they impacted downstream reporting.
- Managed stakeholder communications and high-priority escalations, consistently resolving issues within SLA to keep reporting operations uninterrupted.

PROJECTS

- AI Personal Fitness & Diet Planner (Generative AI) — Built an AI-powered recommendation system with Python, Streamlit, and Google Gemini for personalized fitness/nutrition plans; applied prompt engineering and benchmarked multiple AI models to improve output quality.
- E-Commerce Business Analytics — Analyzed customer behavior, sales trends, and delivery performance using Power BI, SQL, Excel, and Tableau; delivered inventory-planning and customer-experience recommendations.
- Airline Performance Analytics — Analyzed 100K+ flight records to identify operational inefficiencies and delay patterns; built dashboards supporting scheduling optimization.

EDUCATION

MSc in Artificial Intelligence for Business — NEOMA Business School, France

Oct 2025 – Present

B.Tech in Mechanical Engineering — G. Pulla Reddy Engineering College, India

Jul 2018 – Jul 2022
